Objective:

To secure a full-time backend developer position at NexGenIOTS in Gurgaon, utilizing my skills in Node.js, JavaScript, and API development. With a passion for creating efficient and scalable applications, I aim to contribute to the company's growth by leveraging my technical expertise and delivering high-quality solutions.

Skills:

- Proficient in Node.js, Express, Ejs templating engine
- Experience with JWT for authentication
- Good with creating responsive websites
- Knowledge of Rest API and MongoDB
- Familiarity with React.js framework and Git & GitHub
- Know the use of Chatgpt for productivity
- Knowledge of MVC architecher

Projects:

1. Portfolio Website:

- The portfolio website serves as a digital representation of my professional achievements and goals, making it a valuable asset for potential employers to gauge my capabilities.
- The website's backend is built using Node.js, Express.js, and MongoDB with Mongoose. This powerful combination allows for efficient handling of data, and seamless integration with the front-end.
- The front end is developed using React, providing a responsive and user-friendly interface. The website offers a smooth browsing experience, with intuitive navigation, visually appealing design, and interactive components to captivate visitors and showcase my work effectively.

2. Hotel Booking API:

- This project aims to create an API that allows users to search for hotels in a city, check room availability, and book rooms. Use node.js with express to build the routing system, which will help users navigate through the different features of the API.
- To ensure that only authorized users have access to the API, I have two tools: Bcryptjs and jwt. These tools will help us to authenticate and authorize users, which will help to keep the API secure.
- For the database, we will be using MongoDB. This will allow us to store all of the hotel and user information needed to make the API work. By using MongoDB,

3. Library Register Web Application
- Built a productivity web application for students and workers to keep track of their workplace attendance, make a to-do list, and take notes as images
- Use Bootstrap for the front end, Node.js with Express for the backend, and MongoDB with Mongoose for the database.
- Implemented Google OAuth2.0 for authentication and Cloudinary API for photo uploading
-

Education:
- B.Sc, Pandit DeenDyal Upadhyay Shekhawati University, Sikar(Raj), 2016-2019, 60%
- High Secondary(PCM), Rajasthan Board, Ajmer, 2014-2015, 86%

Certifications:
- Full stack web developer, Udemy
- Mastering the coding Interview, Udemy
- A React complete guide, Udemy
